

**PRACTICAL MALWARE RESEARCH PROFESSIONAL**

# **LEARN HOW TO HACK, THEN PROVE IT.**

The professional-level Practical Malware Research Professional (PMRP) exam prepares students for a career in malware analysis. Students will document malware samples, report on their findings, and create detection rules.

# What is the Practical Malware Research Professional (PMRP) Certification?

The Practical Malware Research Professional (PMRP) is a one-of-a-kind certification focused on malware analysis, research, and triage. This unique exam experience will put the student in the shoes of an enterprise-level malware researcher who must identify, report on, and remediate malware. Students will have **five (5) full days** to complete the assessment and an additional **two (2) days** to write a professional report.

The Practical Malware Research Professional certification was formerly known as the Practical Junior Malware Researcher. As of November 2024, we have updated the names of our certifications to better align with job postings and hiring manager preferences. The exam itself has not changed, only the name! [Read more](#) on our blog.

## How to Pass the PMRP Exam

In order to receive the certification, a student must:

- ➔ Apply a wide array of malware analysis methodologies to document the technical details of malware samples.
- ➔ Create a professional malware analysis report that documents each sample's key technical facts.
- ➔ Create detection rules based on malware characteristics.

TCM Security exam vouchers are valid for 12 months and come with access to the training materials the exam is based on. Access begins on the day the voucher is purchased. We highly recommend preparing before attempting the exam. If you don't initially succeed, don't worry! We never want to profit on failure and include **one free retake** with every exam voucher.

## Practical Malware Research Professional Exam Format

Like all TCM Security certifications, the PMRP exam was designed to teach students how to apply their skills in a real-world situation. Our exams provide an experience that is similar to what you will be asked to do in a professional environment.

➔ NO multiple choice questions.

## WHAT IS INCLUDED

9+ Hours of On-Demand Training (12 Months Access)

Hands-On Local Labs

1 Exam Attempt + 1 Free Retake (12 Months Access)

5 Days to Complete the Exam

2 Days to Write Report

24/7/365 Course Support

## PREREQUISITES

Beginner IT Knowledge

Comfort in the Linux and Windows Command Line

Computer w/ 6GB of RAM and Capable of Running Virtual Machines

**Save 20% During Our Summer Sale!**

# Who Should Take the Practical Malware Research Professional Exam?

The PMRP is a professional-level exam focusing on the realm of malware analysis. Malware analysis is a critical skill in the cyber security field. It can be a standalone job role in and of itself or supplement many different blue team roles. These job roles include:

- Malware Analyst
  - Malware Reverse Engineer
  - Security Researcher
  - Threat Hunter
- 
- SOC Analyst
  - Incident Response
  - Detection Engineer
  - Adversary Emulation/Red Team Operator

## What Our Students Are Saying

*“Overall, I had a lot of fun taking the PJMR exam and I would recommend anyone looking for a place to start in malware analysis, to consider the Practical Junior Malware Researcher (PJMR) Certification.” – [Read full review](#)*

## **How to Prepare for the PMRP Exam**

Students who purchase the PMRP certification will receive the following:

12 months of access to over nine hours of training materials from the Practical Malware Analysis & Triage course. The PMRP exam was built from the information and resources that you will find delivered in this course material, including:

- Safe Malware Handling

- Fundamentals of Malware Analysis
- Advanced Analysis Techniques
- Learn malware in multiple programming languages
- Centered on practical labs that bring malware samples to bear in a safe, controlled environment.
- Learn to handle malware safely and construct an isolated lab environment
- Learn the basics of malware analysis on samples designed to teach you the core analysis concepts
- Learn to use automated workflows and advanced analysis to extract key facts about real-world specimens
- Learn the keys to writing detection rules and triage reports to tell the world what you have learned

# **All TCM Security Certifications Include:**

## **Video Training**

Receive 12 months of access to video-led training that was developed to provide a hands-on learning experience.

## **Realistic Exams**

Our certification exams are designed to provide the student with a real-world test experience.

## **Free Retake**

If for any reason you need to take the exam a second time, we include a **free** retake voucher. We don't profit from your failures.

## **Industry Recognized**

We are pleased to provide the most realistic and cost-effective cybersecurity certifications recognized by industry professionals and organizations.

## **Non-Invasive Experience**

Complete the exam in the comfort of your own home without proctors or installed monitoring software.

## **Stable Environments**

Get unlimited access to our stable student exam environments. Hosted safely for you in the cloud.

## **Unbeatable Support**

We proudly offer 24/7/365 customer support with the additional benefit of access to our community Discord with over 60,000+ students.

## **Discounts**

We happily provide military, veterans, students, teachers, and first responders with a 20% off coupon, valid on certification vouchers. Reach out to [support@tcm-sec.com](mailto:support@tcm-sec.com) with proof to get your code.

# Request Certification Reimbursement

Training doesn't stop once you land a pentesting position. If your company offers a training budget or reimbursement for continuing education, consider using it on TCM Security [live training and certifications](#)! To make things easier, we've created a Training Budget Request Template—a customizable document designed to align your learning goals with your company's objectives. Be sure to follow your company's policies and procedures to increase the likelihood of your request being approved.

## Training Options for Organizations

Are you a manager looking to upskill your team? We offer bulk discounts for organizations looking to purchase multiple certification vouchers. Ask us about our training bundle. We also conduct private group session training. Please reach out to us at [info@tcm-sec.com](mailto:info@tcm-sec.com) if you are interested in learning more about those options!

# Frequently Asked Questions

## **Do I need a set-up malware analysis lab ahead of time to take this exam?**

No, the exam environment includes a pre-built malware analysis lab that you can access through the exam VPN. All you need is the exam VPN file and a web browser.
